# AeroSat Corporation Names New CEO

Amherst, NH, Oct 28, 2011 (PRWeb.com via COMTEX) — AeroSat Corporation named industry expert Dennis Ferguson as the company's new CEO. Mr. Ferguson will leverage the company's long history of quality engineering robust broadband airborne antennae systems into new markets and new opportunities through strategic alliances and product development.

"AeroSat has a great position in the industry," said Nim Evatt, Chairman of the Board, AeroSat. "Having Dennis Ferguson on board allows us to build our management team and focus on business development and operations." Mr. Ferguson has more than 30 years experience in aviation and has a significant track record transitioning entrepreneurial companies into market leaders. He most recently served as President and CEO of Mooney Airplane Company and prior to that was President of Airshow, Inc., an avionics manufacturing company that introduced the first passenger connectivity application that used an airborne telephone data link.

"At AeroSat I intend to continue to strengthen the company financially while targeting growth niche markets," said Mr. Ferguson. "We will build customer confidence through exceptional product engineering, and expand our market reach through strategic partners and attentive customer relationships."

AeroSat Corporation was founded in 1997. The company produces and distributes aviation communications solutions to increase the flow of in-flight information. From its patented core technologies, the company has created a product line of antenna systems for over 380 corporate and commercial aircraft operating in every region of the world using multiple commercial satellites. These systems enable the worldwide reception of television in aircraft, Internet satellite communications and aircraft-to-aircraft communications. AeroSat is located at 62 Route 101A, Suite 2B in Amherst, NH 03031. You can visit them online at [www.aerosat.com](http://www.aerosat.com).
